

Isolation of Safety Critical Functions
on our Machines and Equipment are
Engineered in Accordance with the
Relevant Standards

ABN: 81 113 707 092

HAZARD ANALYSIS + SAFETY FUNCTION + RISK
ASSESSMENT = SAFETY INTEGRITY.

THINK SAFE, WORK SAFE - BE SAFE

YOU CAN DEPEND ON OUR RISK BASED
APPROACH TO ACHIEVE HIGHER LEVELS OF
SAFETY.

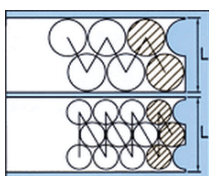

Servo Roll Feeder Zig Zag

Light Duty

SRFZZ-LD

The SRFZZ-LD Series Servo Feeders provide speed, precision and power needed for feeding coil into Metal Stamping Presses.

The SRFZZ-LD Series feature Zig-Zag feeding. The feed head itself is moved from side to side by an AC Servo motor under the control of the NC unit. This can provide a material and hence cost savings of up to 10% when compared to a conventional feeder.

This series of servo roll feeders offer modular design and construction as the basis for their competitive edge. Rugged and precise construction of the feed head and exceptional quality of components make this series of servo roll feeders 'the best value in the Industry'. This series feature two precision AC Servo motors, rigid one piece heavy cast frame construction to ensure reliability and long life with an accurate repeat feed capability.

All models feature air pilot release for accurate material positioning.

Series	SRFZZ-LD series	
Coil Width (mm)	300	400
Coil Thickness (mm)	0.3 ~ 3.2	
Feeding Roll (pcs)	2	
Feeding Motor	Servo Motor	
Feed Speed (M/min)	20	
Feeding Accuracy (mm)	±0.05	
Air Pilot Release	Yes	
Feeding Height	70-180
