Universal Press Brake Bending Tools

One piece maximum length = 4.6M

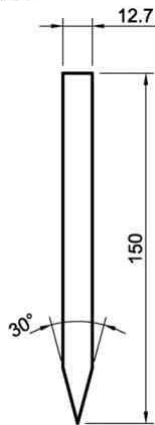

Multi Vee Die

Part No: MVD x L

Bottom Multi Vee dies are available in either K1045 or tool steel. The tool steel is through hardened so it is possible to reshape at some later stage if worn or damaged.

Can be manufactured with other various "V" opening sizes.

Vee opening rule of thumb: all 8 to 10 times material thickness.

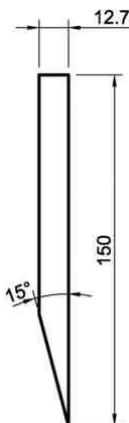

Part No: CSB x L

Centre Sharpened Blade

Manufactured from high tensile spring steel.

Strong on the working face for heavy bending work.

Use Side Sharpened Blade for return bends.

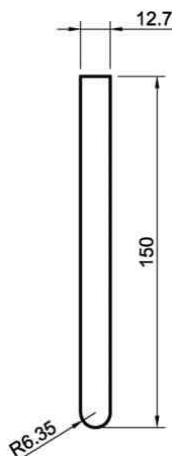

Part No: SSB x L

Side Sharpened Blade

Manufactured from high tensile spring steel.

Use for return bends.

Part No: RB x L

Radius Blade

Manufactured from high tensile spring steel.
